SUMMARY

I'm pursuing two engineering degrees at the same time: Artificial Intelligence at Hybridge Education and Industrial Engineering at UVEG. Alongside my studies, I automate operations for a distribution company, where I turn what I learn into systems used every day.

EXPERIENCE

Independent AI & automation developer — Independent, for a distribution company · Sep 2026 – present — CURRENT
- I automate the company's daily operations and I'm developing its first AI solutions.
- I maintain the daily audit pipeline in Python and Apps Script (v7, in production).
- I build internal tools for orders and inventory control.

Warehouse manager — Same company — AUG – SEP 2026
- Moved up from administrative assistant to warehouse manager in three months.
- I ran the warehouse's day-to-day operations.

Administrative assistant — Same company — MAY – JUL 2026
- I kept the administrative records and reports for daily operations.
- I coordinated with suppliers and internal teams.

AWARDS

2nd place, Pollar track · 3rd place, Content track — Goya Hack 2026 · CriptoUNAM × UNAM School of Engineering — SEP 2026
- Two awards with Cuentas Claras, one of the 12 finalist projects: a credit ledger signed by both parties and enforced by a Stellar smart contract, presented in a 3-minute pitch.
- Second place in the Pollar track, sponsored by Pollar (wallet and payments infrastructure on Stellar).
- Third place in the Content track.

PROJECTS

AgenteMX — AI agent for legislative transparency — FUNCTIONAL
Answers plain-language questions about how members of Mexico's Chamber of Deputies vote, with official data and source citations. Includes a party-discipline index, a contradiction detector and an election radar.
TECH: Claude API, SQLite, Pandas, BeautifulSoup, Streamlit — github.com/jose2501106-IA/agente-legislativo-mx

Neurona Artificial — An open course on how AI works under the hood — WORK IN PROGRESS
Interactive videos with a hands-on lab to understand how artificial intelligence works, from a single neuron to agents that decide and act. Each lesson has chapters, captions and a lab where you can adjust every part.
TECH: HTML, CSS, JavaScript, Custom design system — jose2501106-ia.github.io/NeuronaArtificial

Audit pipeline — Distribution company · Mexico City — IN PRODUCTION
Automates the warehouse's daily operations audit with Python and Apps Script. Now on version 7, running in production every day.
TECH: Python, Apps Script, Google Sheets — Private repository

Cuentas Claras — Credit ledger signed by both parties · Goya Hack 2026 — 2 AWARDS
The wholesaler records each credit sale and the customer confirms it from their phone, so neither side can log a debt alone or erase the history. A Stellar smart contract enforces the rules.
TECH: Stellar, Soroban · Rust, JavaScript, Node.js — github.com/jose2501106-IA/goyahack_cuentas-claras

EDUCATION

Hybridge Education — AI Engineering — Term 3 of 8
UVEG · Virtual University of the State of Guanajuato — Industrial Engineering — 38% complete
Universidad Anáhuac México Norte — AI & Data Science Seminar — Full scholarship · Santander 2026
Aspire Leaders Program — Global leadership program founded by Harvard faculty — Selected
Oracle Next Education — Immersion: AI Agents for Business — Completed · Oct 13, 2026 · 4 h
Lean Six Sigma Institute — Lean Management — In progress · endorsed by The Council for Six Sigma Certification

SKILLS

PROGRAMMING Python, JavaScript, TypeScript, SQL, Bash · AI & DATA Claude API, Claude Code, OpenAI, Pandas, NumPy, Streamlit · AUTOMATION Apps Script, Google Workspace, Advanced Excel, GitHub Actions · CLOUD & HARDWARE AWS, Docker, Linux, Arduino · PROCESS Lean Six Sigma, DMAIC

LANGUAGES Spanish · native; English · A2, improving (Bécalos English scholarship)

SOFT SKILLS Communication: two national public-speaking competitions and Youth Parliament. Leadership: Aspire Leaders Program. Fast-paced operations: daily decisions in a business with customers and suppliers.
